浙大迪迅
Zheda Dixun

DX-Reader

(Medical magnifier)

DX-C1

High sensitivity

Accurate result

Good repeatability

Fast reading

Features

- High sensitivity, good repeatability, **15** samples are tested at one run, and fast reading are completed in 3 minutes.

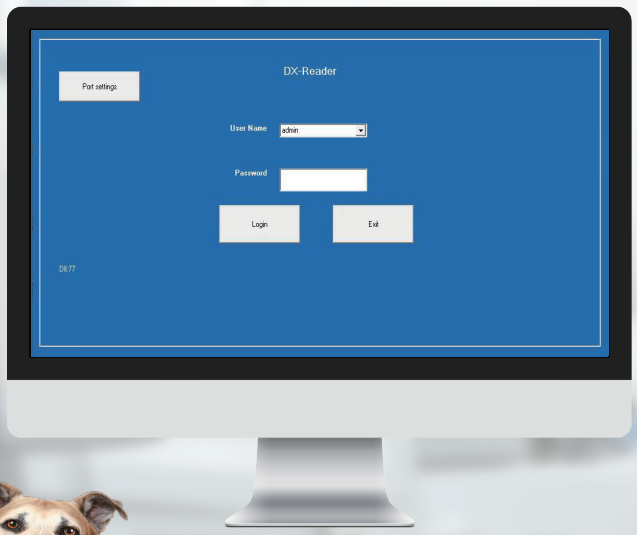

Scope of application

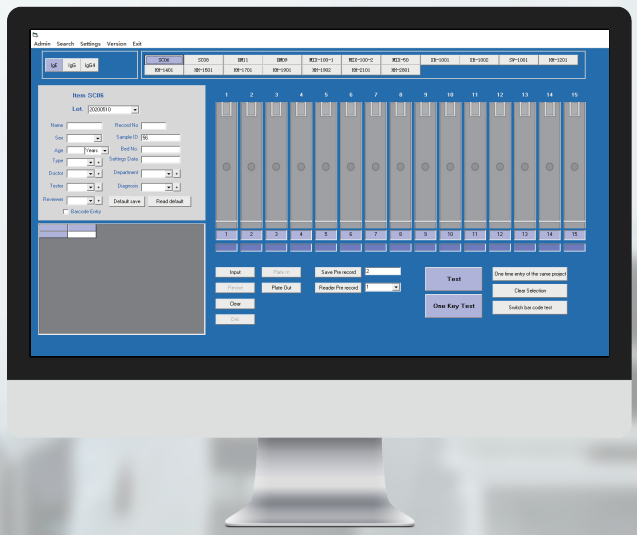

- For the prouducts of Zheda Dixun's immunoblotting line and protein microarray line.

D3:Dermatophagoid

Features

- Fully automatic scanning, analysis and recording of results.
- High throughput analysis and result processing up to 15 samples at one run.
- Electronic archiving of images and data for easy backup and search.
- Test results can be integrated into the hospital LIS system.
- Testing reports can be printed in batch and exported in different formats.
