Hangzhou Zhunxin Biotechnology Co.,Ltd

Aimbio

COMPANY PROFILE

Hangzhou Zhunxin Biotechnology Co., Ltd. is at the forefront of molecular diagnostics. Our mission is to simplify and accelerate diagnostic procedures. With our head office in Hangzhou and a European branch in Sweden, we have an overseas sales team of over ten people, with business operations spanning across the globe.

Our expansive R&D center covers 800 square meters, and we operate a 1,400 square meter GMP factory. We're powered by a dedicated team of over 60 professionals, half of whom are R&D specialists. Our team's commitment has led to 30 registered patents, with an additional 20 patents awaiting registration.

Aimbio

01 / Solutions

AIMDX1800/8800 is an advanced automated system designed for nucleic acid extraction, amplification, and analysis.

This system employs our unique AIM-cartridge, a single-use consumable equipped with nucleic acid extracting reagents and PCR freeze-dried reagents, ensuring a seamless sample-to-result experience for the user.

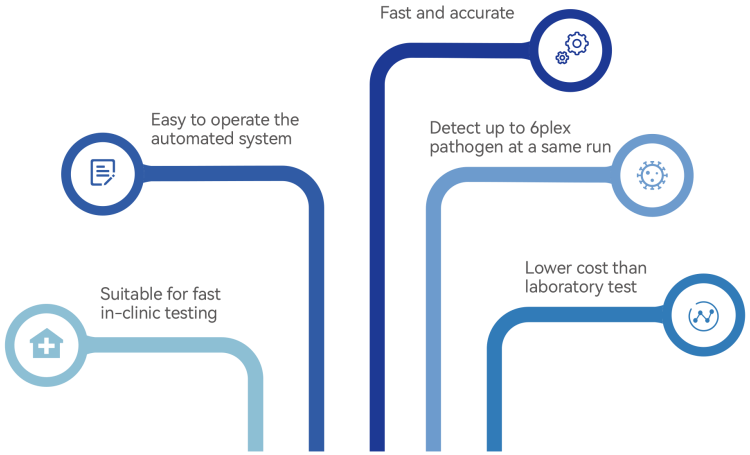

With the AIMDX1800/8800 system, clinics can effortlessly conduct automated PCR tests. Technicians simply need to collect the sample, load it into the kit, insert the kit into the instrument, and initiate the test.

Significantly Reduced Test Turnaround: From 3 days down to under 1.5 hours.

Cost-Effective: Reduces test expenses by at least 50%.

Aimbio

02 / Advantages

03 / Results

	Laboratory	AIMDX 1800vet
Convenience	Lab delivery	In-clinic
Time	2-5 days	1.5 hours
Cost	Traditional pricing	More cost-effective, especially for multiple pathogens
Operation	Samples should be processed and stored according to laboratory requirements	Sample-to-Result report
Efficiency	It might be too late on some cases due to the long test turnaround time	Patients can be treated accurately the same day

VS

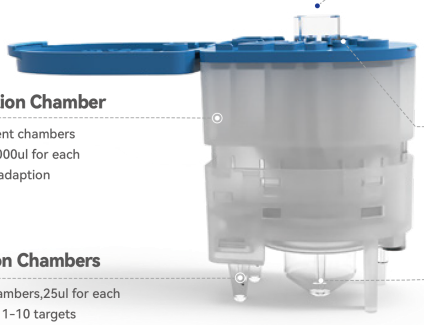

04 / Introduction

- **Fast:** Result in less than 1.5 hours
- **Efficient:** Less than one minutes hands on time

- **Golden Standard:** Uses Real-Time PCR technology delivering high quality results with Ct values
- **All in one:** Prepacked reagents and automated process provide sample-to-result diagnostics

05 / Aim Cartrige

Multiplexed Molecular Tests
- 1 minute to set up the sample and cartridge
- Fully enclosed cartridge minimizes contamination risks
- Sample-to-answer system provides a report within 1.5 hours
- 49*33*69 mm

Extraction Chamber
-10 different chambers
- 200ul-6000ul for each
- Flexible adaption

Sample Port
- Nasal swab
- Oral swabAnal swab
- Faeces
- Blood

Reaction Chambers
- 2 pcr chambers,25ul for each
- 5 colors, 1-10 targets
- Freeze dried PCR reagents

Extraction Chamber
- Magnetic bead extraction method
- Uttrasonic lysis
