MedFluid

Microfluidic-based POCT total solution
-Veterinary In-House Antibiotic Susceptibility Test

Founder/CEO: Bon Lee

About MedFluid Co., Ltd.

- Founded: 2019
- Registered Location: Nankang Software Park, Taiwan
- R&D Centre: Hsinchu Biomedical Park, Taiwan
- Sector: MedTech / Biotechnology (11 Microfluidic Design Patents)
- Team: 8 full-time Employees/1 part-time Employee
- Target Market:
  - Primary: Veterinary Sector (Clinics, Distributors, Livestock Farming)

Achievements & Honors

2016 13th Taiwan National Innovation Award

2019 Medfluid Founded

Innovex pitch contest 2019 in COMPUTEX: Grand Prize & Startup Terrace Award

2020 4 Taiwan and international microfluidic invention patents granted

Selected into 9th AAMA Taipei Entrepreneur

2021 2 U.S. microfluidic invention patents granted

6 Taiwan and U.S. invention patents application

2022 Selected to TOP 12 medical start-up of 11th MEDICA Start-up competition

2023 2023 Taiwan X Berkeley Public Health - Health Innovation Accelerator Program

Product NAST officially launched

2025 The 3rd prize of Great pitch of Wolves Summit in Poland

START-UP COMPETITION MEDICA

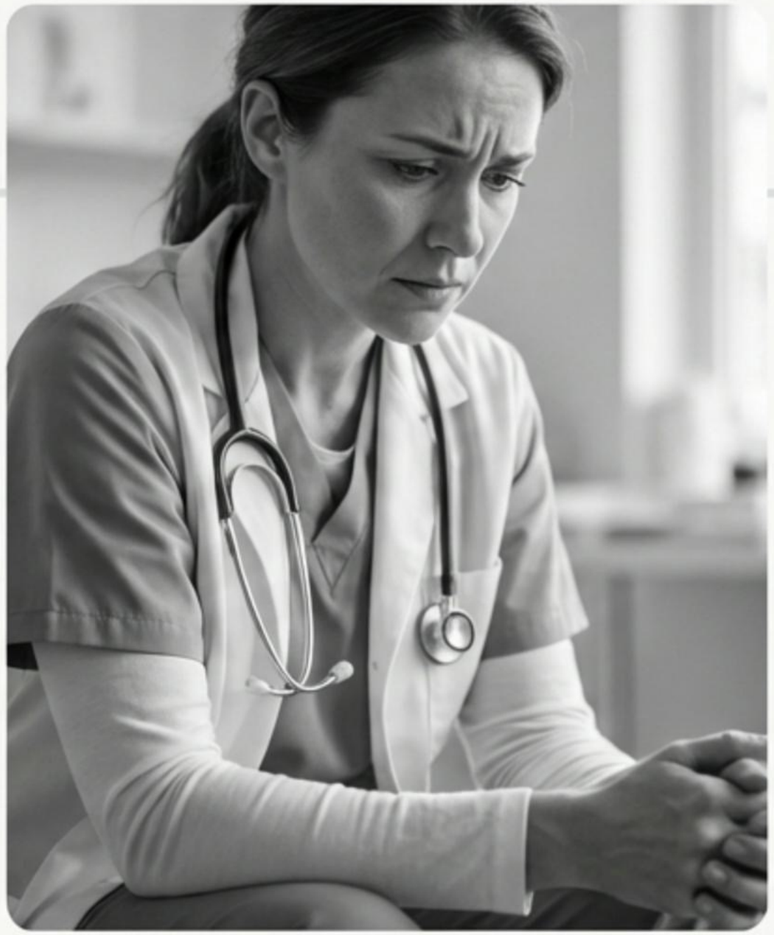

Taipei 搖籃計劃

SparkLabs TAIWAN

Berkeley Public Health

The 7- Day Guess: A Vet’s Daily Dilemma

Prescribe Blind

Act immediately based on experience. Risk of treatment failure, side effects, and fueling antibiotic resistance.

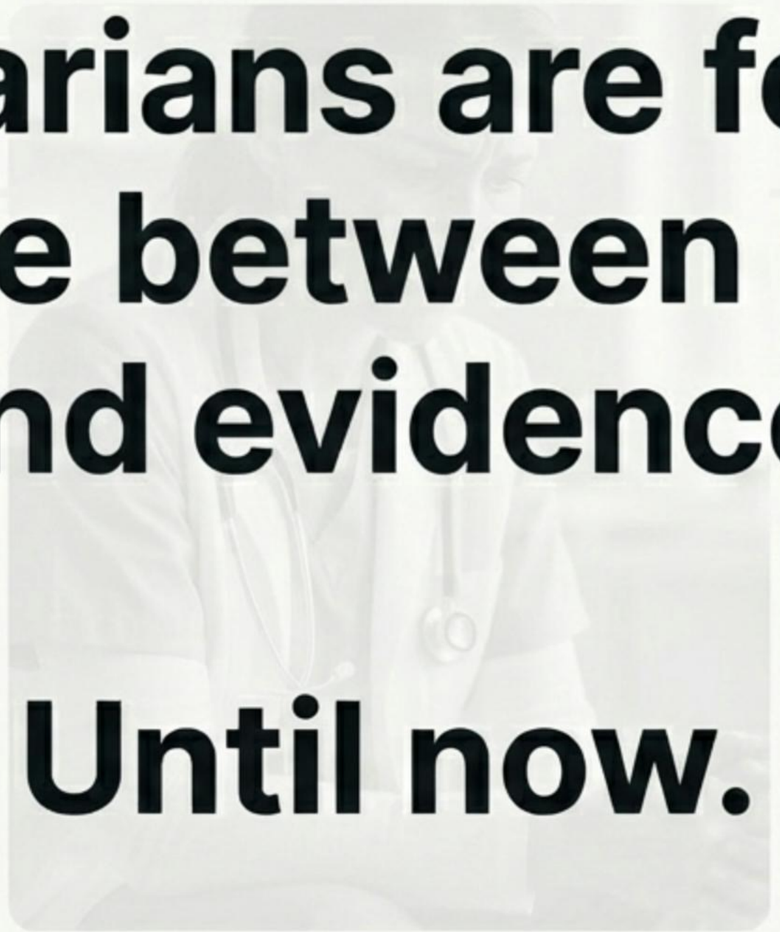

Wait for the Lab

Wait 7 days for an evidence-based report. Risk of prolonging animal suffering and disease progression.

醫流體機密資料 禁止複製、轉載、外流 Copyright © 2025 MedFluid. Proprietary and Confidential.

The 7-Day Guess: A Vet's Daily Dilemma

Veterinarians are forced to choose between action and evidence.

Until now.

Prescribe Blind

Act immediately based on experience. Risk of treatment failure, side effects, and fueling antibiotic resistance.

Wait for the Lab

Wait 7 days for an **evidence-based report.** Risk of prolonging animal suffering and disease progression.

NAST- Nest-shape Antibiotic Susceptibility Test

1 AST Analyzer
(Antibiotic Susceptibility Testing)

2 Consumable
Cartridges

醫流體機密資料 禁止複製、轉載、外流 Copyright © 2025 MedFluid. Proprietary and Confidential.

Evidence. In Hours.

Results in hours, not days.

Evidence-based antibiotic selection.

Designed for the in-clinic workflow.

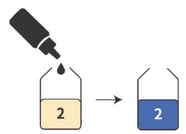

15 antibiotics in 6 hr

Basis

Patented microfluidic cartridge with 33 pre-loaded drug wells, a portable analyzer and a bacteria-viable color indicator.

Easy to Use: only 3 steps to get the report!

① Collect samples and do pre-culture

② NAST Cartridge Process

③ Real-Time Detection and Reporting

Central Lab: 7 Days

NAST: In-Clinic, Today

Scenario 1:
The Daily Infection

For the most common cases—skin, UTI, and wound infections—NAST replaces the first guess with the right answer.

90%

of clinics rely on empirical antibiotics for initial infections.

醫流體機密資料 禁止複製、轉載、外流 Copyright © 2025 MedFluid. Proprietary and Confidential.

Scenario 2: The Cycle of Failure

Transform chronic, recurring infections from a source of clinical frustration into a demonstration of clinical excellence.

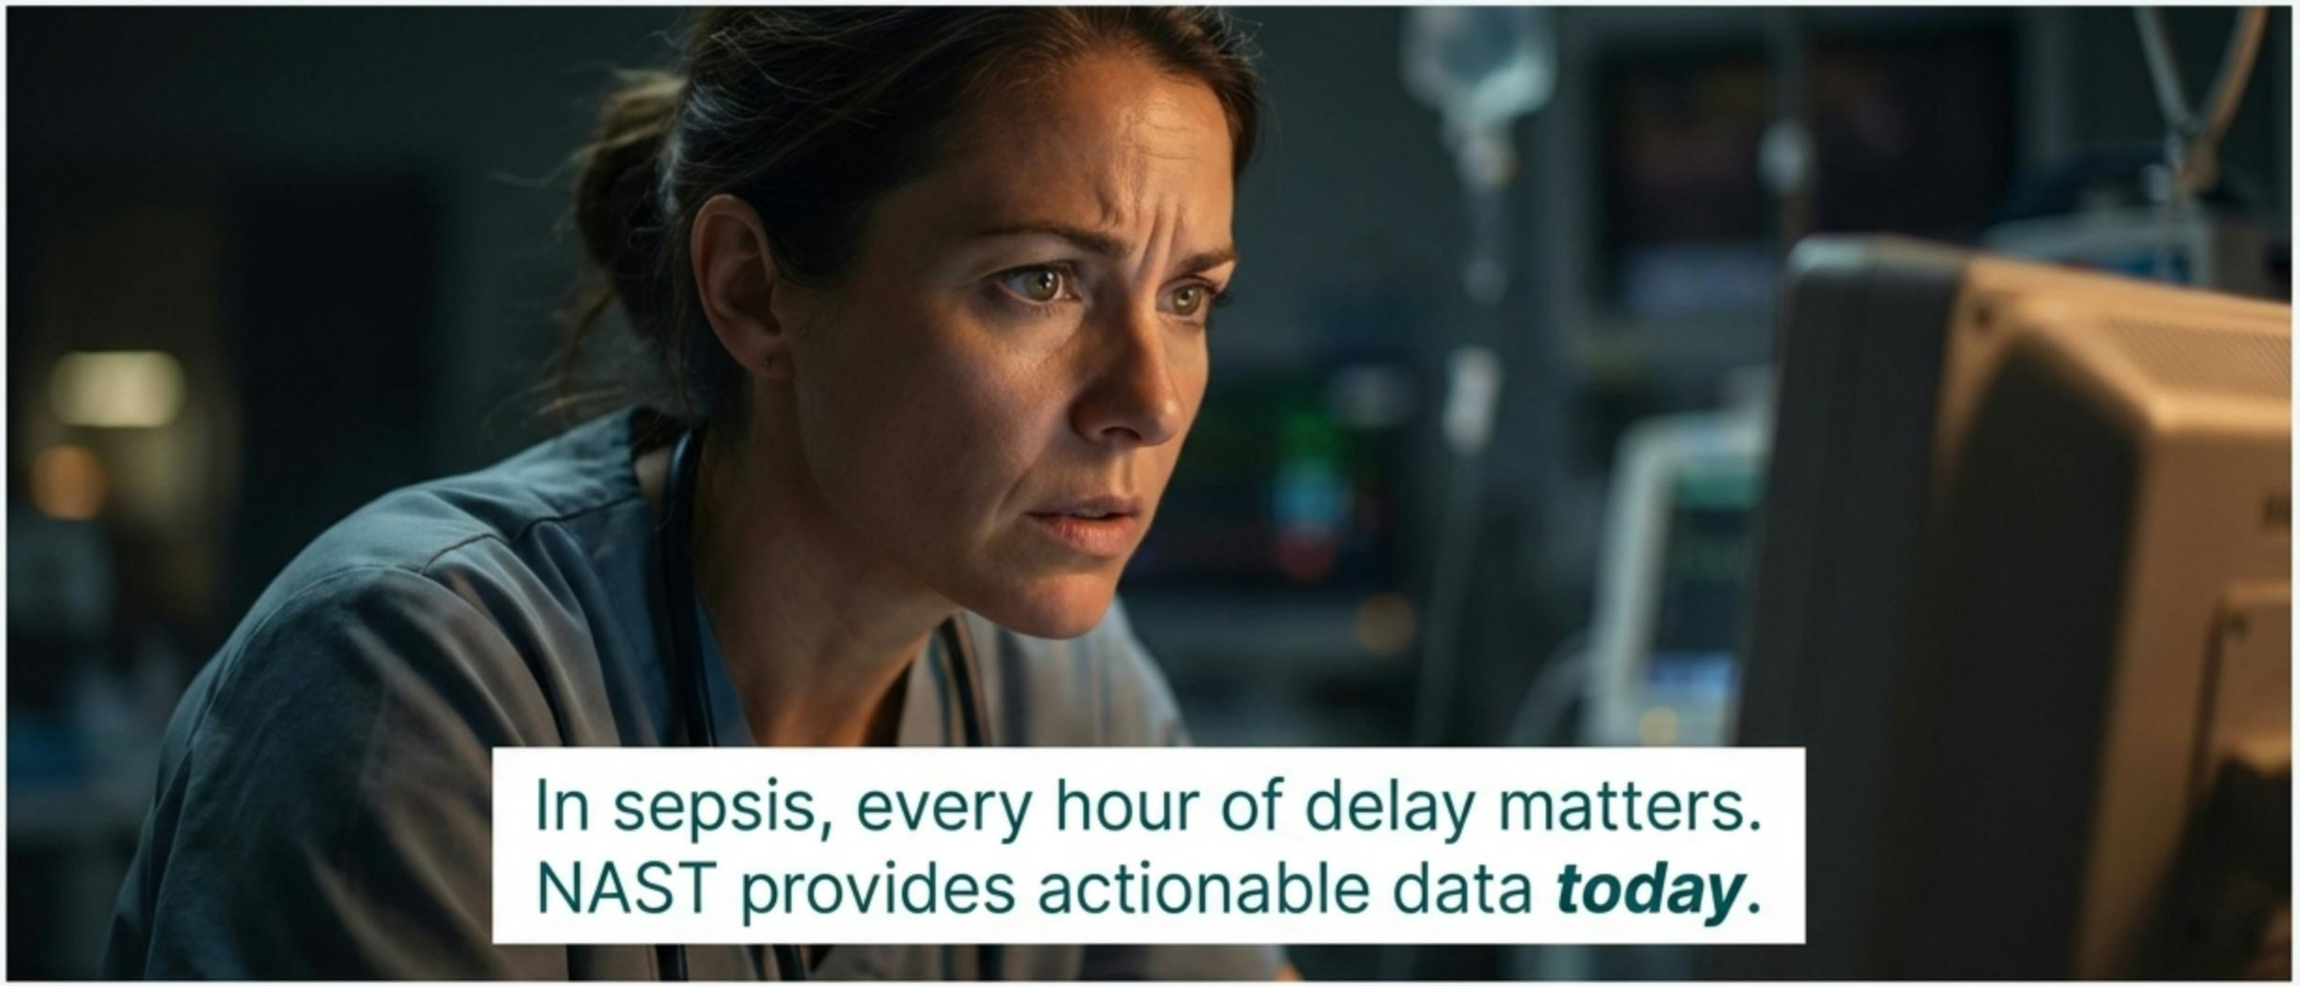

Solve the unsolvable case in-house.

醫流體機密資料 禁止複製、轉載、外流 Copyright © 2025 MedFluid. Proprietary and Confidential.

Scenario 3: The Race Against Time

In the ER, ICU, or post-op, waiting for a lab isn't an option. **NAST** provides the crucial, same-day evidence needed for critical decisions.

醫流體機密資料 禁止複製、轉載、外流 Copyright © 2025 MedFluid. Proprietary and Confidential.

Scenario 4: Empowering the Majority

NAST delivers modern diagnostics to the vast number of general practices that have no microbiology equipment.

80-90%

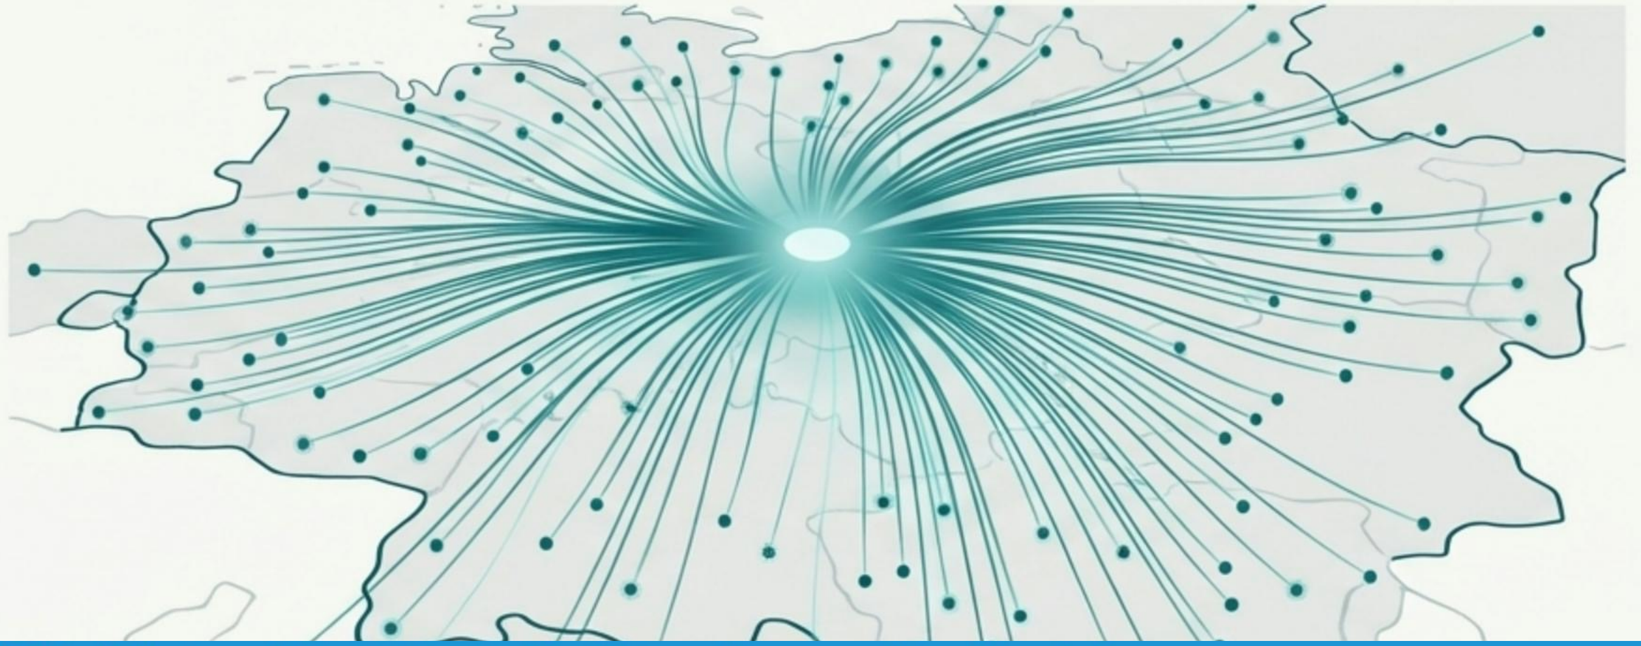

of global veterinary clinics have no in-house culture or AST capabilities. NAST unlocks this new market.

Scenario 5: The Global Data Moat

Every test contributes to a real-world, frontline database on Antimicrobial Resistance (AMR), informing policy and protecting animal health on a global scale.

From an individual diagnosis to a collective shield against AMR.

We Don’t Replace the Central Lab.
We Fill the Gap They Can’t.

The Point of Decision

- Same-Day Urgency
- In-Clinic Workflow
- Actionable for a Single Case

Reference-Level Confirmation

- High-Throughput Batching
- Full 30+ Antibiotic Panels
- Epidemiological Research

Product Traction: Validated, Commercialized, Growing

This is not an MVP.
It is a validated diagnostic platform with paying customers, global adoption, and accelerating market pull.

Strategy Validation: Proven Market Entry

Our go-to-market strategy is not theoretical — it has already been executed and validated across multiple international markets.

Canada
Target market entry: 2026

USA
Target market entry: 2026

Europe (will keep expanding in 2026)
Signed: Germany
Purchase: Italy, Spain, Boulgaria, Romania, Poland

Middle East
•Signed: Turkey
•Purchase: Saudi Arabia

Northeast Asia
•Signed: South Korea
•In negotiation: Japan

Taiwan (Directly Sale)

Southeast Asia
•Signed: Malaysia, Philippines, Indonesia, Thailand

Latin America (will keep expanding in 2026)
Purchase: Uruguay
