JCHYTECH – Pan-EU Veterinary Diagnostic Dossier

Allergy Kits (Canine/Feline) – France,
Germany, Spain, Italy, Belgium

JCHYTECH

Veterinary Diagnostic Kits: Regulatory & Market Overview (France,
Jean-Claude Havaux – Regulatory Affairs Division

Executive Summary

- • Import and distribution of veterinary diagnostic kits (ELISA & Lateral Flow).
- • Target: canine/feline allergy testing for veterinary clinics.
- • No IVDR/CE marking required for veterinary use.
- • Compliance required: REACH, CLP, French SDS and labelling.
- • Border checks (SIVEP/CHED-A) only if animal-derived materials present.

EU & French Regulatory Framework

- • Veterinary IVDs are excluded from Regulation (EU) 2017/746 (IVDR).
- • No CE marking required – general product safety rules apply.
- • French competent bodies: DGAL (Agriculture Ministry) and ANSES.
- • Validation by ANSES NRLs only required for regulated diseases.

Chemical & Safety Compliance

- • CLP Regulation: labelling, pictograms, hazard (H) and precaution (P) statements.
- • REACH Regulation: importer obligations for substances and mixtures.
- • UFI/PCN notification required for hazardous mixtures sold in EU.
- • French-language Safety Data Sheet mandatory for all reagents.

Importer Obligations

- • Ensure French labelling and IFU for all marketed products.
- • Maintain technical documentation and performance data for 10 years.
- • Implement vigilance and traceability procedures (lot recall, CAPA).
- • Keep records of supplier qualifications and certificates (ISO 13485 preferred).

Border Procedures (SIVEP / CHED-A)

- • Required only if reagents contain animal-derived materials (sera, antibodies).
- • Documentation: commercial invoice, sanitary certificate, DSCE/CHED-A, SDS.
- • Entry via authorised Border Control Post (BCP/SIVEP).
- • Customs classification: HS 3822.00 (diagnostic reagents).

Label & IFU Examples

- Label must include:
 - Product reference, lot number, expiry date, storage conditions.
 - Manufacturer and importer details, CLP pictograms and UFI (if applicable).
 - Clear indication: 'For veterinary professional use only – Not for human diagnosis.'
- IFU must describe principle, procedure, interpretation, and precautions.

ANSES / NRL Validation Overview

- • Allergy kits (cat/dog): no validation required – non-regulated use.
- • Regulated diseases (ASF, avian influenza, brucellosis, TB, rabies):
 - - Validation by ANSES National Reference Laboratories mandatory.
- • Reference tables updated annually by ANSES website.

90-Day Implementation Plan

- Weeks 1–2: Supplier qualification, confirm animal-derived content.
- Weeks 3–6: Finalise French labels, SDS, and import logistics (SIVEP setup).
- Weeks 7–12: Pilot import, perform QC and stability checks, implement vigilance system.
- Parallel: initiate ANSES validation if expansion to regulated tests is planned.

Confidentiality Notice

- Confidential – For internal and partner use only.
- © JCHYTECH 2025. All rights reserved.
- This presentation contains proprietary information intended solely for strategic and regulatory planning purposes.

Executive Summary

- Veterinary diagnostic kits fall outside Regulation (EU) 2017/746 (IVDR).
- ABP content (e.g., sera/antibodies) triggers Border Control (CHED-A/TRACES NT).
- Allergy kits are non-notifiable; no national validation required.
- Main obligations: product safety, CLP/REACH, local-language IFUs, EPR packaging.

France

- Not under IVDR; ANSES & DGAL oversight.
- Border: SIVEP/BCP + CHED-A via TRACES if ABP.
- Label/IFU: French.
- EPR: national producer obligations.

Germany

- Outside IVDR; product safety principles.
- FLI authorization for notifiable diseases only.
- Label/IFU: German.
- EPR: VerpackG/LUCID registration.

Spain

- Outside IVDR; MAPA oversees notifiable diseases.
- EPR: Royal Decree 1055/2022 – register + SCRAP.
- Label/IFU: Spanish.
- Border: CHED-A/TRACES if ABP.

Italy

- Outside IVDR; guidance under Ministry of Health.
- IZS network for reference testing.
- Label/IFU: Italian.
- EPR: CONAI registration.

Belgium

- Outside IVDR; FASFC/AFSCA & Sciensano reference.
- Label/IFU: FR & NL (DE optional).
- EPR: Fost Plus / Valipac.
- Border: CHED-A/TRACES if ABP.

Comparative Overview

Theme	FR	DE	ES	IT	BE
IVDR applicability	No	No	No	No	No
Language	FR	DE	ES	IT	FR+NL
EPR Packaging	EPR national	VerpackG	RD 1055/2022	CONAI	Fost+/Valipac
ABP Border	SIVEP/CHED-A	BCP/CHED-A	BCP/CHED-A	BCP/CHED-A	BCP/CHED-A

Major Discrepancies

- Language requirements differ (France FR, Germany DE, Spain ES, Italy IT, Belgium FR+NL).
- Distinct EPR packaging systems with separate registrations.
- Different national reference bodies for notifiable diseases.
- Border control nomenclature and booking procedures vary.
- Belgium uniquely bilingual for IFUs.

EU5 Market Prioritization

+

•

0

Market Trends

- Strong increase in Pet dermatology consultations (+8–12%/year)
- Rising pet ownership across EU
- Owners demand rapid answers; less tolerance for guesswork
- Insurance coverage expanding in FR/IT/ES
- Clinics shift to rapid diagnostics for margin optimisation

+

•

0

Data on Pet Allergies

- Dogs: 12–18% prevalence
- Cats: 10–14% prevalence
- Less than 25% of symptomatic cases tested
- Symptoms: pruritus, skin lesions, respiratory signs

+

•

0

Data Pet Viral Diseases

- Parvo, Distemper, Corona in dogs
- Panleukopenia, Calicivirus in cats
- Strong driver for rapid in-clinic testing

Pet Allergy Diagnostics Market

Data

Pet Allergy Diagnostics Market

- Global: \$370M (2025)
→ \$714M (2035)
- EU is fastest-growing region
- Diagnostics driven by insurance, dermatology and vet margins

Pet Allergy Diagnostics Market

- Global: \$370M (2025) – \$714M (2035)
- EU is fastest-growing region
- Diagnostics driven by insurance, dermatology and vet margins

Segmentation

- By test type: LFIA, ELISA, Di
Arrays
- By channel: clinics,
specialists, distributors, D2C
- By species: dogs (~75%), cats
(~25%)

REGULATIONS

Product Classification :

classified as **Veterinary Medical Devices (VMDs)**.

CE Marking

not mandatory for all VMDs, but it is **recommended** to become rapidly ISO 9001 and 13485.

Marketing Authorization (MA)

mandatory for VMD providing Technical Documentation Proof of Performance/Validation AND required Labeling Reg in the official language of each country of sale.

Diatech as Importer:

Responsible for the Chinese manufacturer's quality compliance and for having complete technical documentation.

Mandatory registration as an economic operator with the competent authority for each country

Competitive Landscape

Lab IgE panels: detailed but slow & expensive

Existing rapid tests: inconsistent quality

Specialists: limited throughput

DIATECH: Fast + Accurate + Affordable + Scalable

Pricing Benchmarks

Lab IgE panels: €85–150

Rapid tests: €28–45

Dot arrays: €120–180

Proposal DIATECH Rapid Test: €35–39

Proposal DIATECH Array: €120–150

Regulatory Roadmap (EU)

DIATECH will be a company active in the field of in vitro diagnostics (IVD) for veterinary use.

In a highly regulated environment, DIATECH aims to structure its quality approach in order to guarantee compliance, customer satisfaction, brand image, and credibility on the European market.

The strategy is to benefit from relative low requirement on veterinary diagnostic to speed entry in the market. When confidence in operations will be confirmed, ISO 9001 regulations is mandatory.

REMARK : for IVD regarding epidemics in animals, regulations are stricter and ISO9001 will be mandatory.

Regulatory Roadmap (EU)

1. IMPORT COMPLIANCE
(DGCCRF + ANSES)

2026

2. ISO 9001
CE-IVD CERTIFICATION (EU
2017/746)

2027

3. **ATTENTION**
VETERINARY REGULATION
IVDR 2017/746

SWOT Summary (Europe)

Strengths: Fast, simple,
affordable, scalable

Weaknesses: New brand,
awareness gap

Opportunities: Pet health
boom, few rapid test
competitors

Threats: Lab incumbents,
regulation timing

Financial & ROI Summary

Revenue forecast: €2M
(2027) → €40–50M (2032)

Gross margin: 55–60%

CAGR: 30–35%

Investment Highlights

High Growth: 30–35%
CAGR in European pet
diagnostics

Strong Economics:
Low cost / high clinic
margin

Scalable Model: B2B
distribution across 5
key EU markets

Regulatory Readiness:
Imports Reg,
IDO9001+CE-IVD

Clear Exit Potential:
Attractive to strategic
acquirers in Vet Sector
